

## IMPORTANT MESSAGE ABOUT H5P ACTIVITIES ON AVENUE.CA

Hello Avenue Teachers,

Avenue.ca currently has two plugins that support H5P activities. There is an older black H5P plugin, also called Interactive Content. H5P activities that use this older plugin have this icon next to it:

In late November this older H5P plugin destabilized H5P activities using the newer plugin, which is found in most Avenue courses. As a result, **we will be removing the older black plugin from the Avenue site effective January 3, 2022.** If you have H5P activities with the black icon next to it, these activities will disappear from your course page (and grade book) at that time. This mainly impacts courses that were migrated from the old EduLINC site.

New courses that have been set up on Avenue (not migrated from EduLINC) should not be impacted by the removal of the black H5P plugin. H5P activities in these new courses use the new blue H5P plugin. This H5P plugin looks like this:

Please take a moment and check your course for H5P activities that use the older black plugin. If these activities are important to you, they need to be converted to the new plugin. Teachers can convert them by following the steps in the Avenue help file, *Converting Interactive Content to H5P*. Here is a link to this file:

[http://www.learnit2teach.ca/wpnew/Avenue\\_Files/more\\_help\\_files/H5P\\_Converting\\_InteractiveContenttoH5P.pdf](http://www.learnit2teach.ca/wpnew/Avenue_Files/more_help_files/H5P_Converting_InteractiveContenttoH5P.pdf)

If you have a lot of these older H5Ps found in the PBLA modules and eUnits, please consider requesting new courseware. You could also delete the PBLA modules (topics), and ask your mentor to request the newer versions of these modules be added to your course.

If you created H5Ps on the EduLINC site and your course was migrated to Avenue, you will need to convert these activities before January 3, 2022 or they will disappear from your course. Please check to avoid losing your work.

Sorry for any inconvenience. This change to the site will avoid future destabilizing of the courseware.
